

SONEXclassic™ Panels

SONEXclassic features a modified anechoic wedge design for cost-effective, yet impressive sound control. Made from class 1 fire-rated willtec foam, these 2' x 4' panels are fiber-free and available in a 2" thickness. SONEXclassic panels can be impregnated with a charcoal dye (colortec) which provides consistent color throughout the panel, from top surface to back.

Product Options

- Painted charcoal, beige, brown, blue or light grey
- Colortec process (panels are impregnated with charcoal dye)
- 2" thickness
